PROGRAM OVERVIEW

The MAC Accounting Information Systems concentration program lays the educational foundation for professional and career goals, including but not limited to the CPA exam. It is designed to prepare graduates for careers in public accounting, industry and government. The program is committed to providing academic and cultural diversity as well as a progressive learning experience. It emphasizes the building of skills necessary to succeed in the business community including teamwork, leadership and the ability to communicate effectively. MAC students concentrating in Accounting Information Systems must choose three approved information systems management courses as their program elections. In addition, students must take IT Audit (ACG 6625) as their accounting elective.

FAU's College of Business is accredited by AACSB International, which has accredited fewer than 20% of U.S. business schools. The School of Accounting has nearly 100% employment placement among its graduate students.
