Methodology

The June survey is the twenty-third in a series of survey's that gauges attitudes of Hispanic and Latino's in the United States. The data is collected using a mixed mode sample of online and telephone participants. The question design and analysis for the Index of Consumer Sentiment is adopted from the University of Michigan's which began in 1946, measuring consumer attitudes and expectations, and are used to evaluate economic trends and prospects (<http://www.sca.isr.umich.edu/reports.php>)

Formatted: Justified

All respondents interviewed in this study were part of a fully representative sample using mixed mode random stratified probabilistic sampling method of N=500 Hispanics over the age of 18, based on a series of screening questions. The margin of error for the sample is +/- 4.33% in 19 of 20 cases.

The survey was administered using an Automated Telephone Interviewing (ATI) system (n=206). The ATI system allows data to be entered directly into a computerized database through the numbers on interviewee's phone, providing a highly reliable system of data collection. The survey was also administered through USAMP, an online sample of Hispanics (n=294). There was a 4.8% response rate for the ATI calls.

The survey was presented in both English (n=284) and Spanish (n=216) versions.

The survey was conducted June 1-30, 2016.

The results presented in this report include univariate and bivariate analysis of the data. Frequency distributions for each item included on the questionnaire are shown in the tables. In all cases, cross-tabulation results are also shown. This type of bivariate analysis examines differences between sub-groups of the overall population.

In the cases where cross tabulation results are presented, a chi-square test, an independent t-test for means, or a Z-test for independent percentages is shown. A chi-square test is used in cases where comparisons are made for categorical variables. A t-test is used in cases where comparisons are made for measurement variables. A Z-test is used in cases where comparisons are made between independent population percentages.

The purpose of these statistical tests is to determine whether or not the observed difference between sub-groups in the sample is due to sampling error or whether it is due to a real difference in the population. When the results are statistically significant, it strongly suggests that the observed difference between sub-groups found in the sample is due to a real difference in the population, and not due to sampling error.

A chi-square significance level of .05 indicates significance at the 95 percent level. In other words, it is 95 percent likely that the results are due to a real difference between comparison groups. A chi-square significance level of .01 indicates significance at the 99 percent level. When a t-test or a Z-test is shown, lower- and upper-case letters indicate significance at the 90 and 95 percent levels respectively.

English Version of Survey

What is your gender?

- Press 1 for Female
- Press 2 for Male

What is your age group?

- Press 1 for 17 and under (end survey)
- Press 2 for 18-34
- Press 3 for 35-54
- Press 4 for 55 and above

Are you of Hispanic, Latino or Spanish origin?

- Press 1 if you're not of Hispanic, Latino or Spanish origin (end survey)
- Press 2 for yes, Mexican, Mexican American, Chicano
- Press 3 for yes, Puerto Rican
- Press 4 for yes, Cuban
- Press 5 for yes another Hispanic, Latino or Spanish origin
- Press 6 to repeat the answer choices

Were you born in the United States?

- Press 1 for yes
- Press 2 for no

How long have you lived in the United States?

- Press 1 for less than 5 years
- Press 2 for 5-20 years
- Press 3 for 20+

We are interested in how people are getting along financially these days. Would you say that you (and your family living there) are better off or worse financially than you were a year ago?

- Press 1 for Better Off
- Press 2 for Worse Off

Now, looking ahead -- do you think that a year from now you (and your family living there) will be better off financially, or worse off, or just about the same as now?

- Press 1 for Better Off
- Press 2 for Worse Off

Now turning to business conditions in the country as a whole -- do you think that during the next 12 months we'll have good times financially, or bad times, or what?

- Press 1 for Good times financially
- Press 2 for Bad times Financially

Looking ahead, which would you say is more likely -- that in the country as a whole we'll have continuous good times during the next five years or so, or that we will have periods of widespread unemployment or depression, or what?

- Press 1 for Good times

Press 2 for Bad times

In your view, is global warming a very serious problem, somewhat serious, not too serious, or not a problem?

- Press 1 for Very serious
- Press 2 for Somewhat serious
- Press 3 for not too serious
- Press 4 for not a problem

Do you think global warming should be a low, medium, high, or very high priority for the President and Congress?

- Press 1 for low priority
- Press 2 for medium priority
- Press 3 for high priority
- Press 4 for very high priority

Do you consider global warming an important issue in the 2016 presidential election?

- Press 1 for yes
- Press 2 for no
- Press 3 for undecided

Do you think that the condition of the environment will be better, worse, or about the same for the next generation?

- Press 1 for better
- Press 2 for worse
- Press 3 for about the same

Are you currently registered as a Republican, Democrat, Independent, another party or are you not registered?

- Press 1 for Republican
- Press 2 for Democrat
- Press 3 for Independent/another party
- Press 4 for Not registered

What is your educational level?

- Press 1 for less than high school
- Press 2 for high school degree or equivalent
- Press 3 for some college but no degree
- Press 4 for a college degree
- Press 5 for Graduate degree or higher

What is your income level?

- Press 1 for under \$25,000
- Press 2 for \$25,001-\$75,000
- Press 3 over \$75,000

Executive Summary

Consumer Sentiment Index

Formatted: Font: Bold

The Hispanic Consumer Sentiment Index (CSI) rose to its highest level since the inception of the index improving from a 93.5 in May to a 105.8 in June. This 12.3 point increase is the second largest increase since January 2015 when it jumped 14.3 points (86.4 in December to 100.7). The University of Michigan (UM) Consumer Index gave back 1.2 points from its May increase, and now the Michigan index lags the Hispanic Index by 12.3 points.

The age cohorts had varying degrees of change with the 18-34 group increasing 25 points from a 98 to 123 and the 55+ group rose to a 65 while those in the 35-54 group stayed at 102 for the second month in a row. Female sentiment bounced back 19 points to 113 after dropping for the first time in the previous three months ~~while it hit 94 in May, 103 in April and 98 in March. Males improved for the second straight month to 99, after posting 93 in May, an 85 in April.~~ Those earning under \$25,000 increased for the second straight month to 110.5 after posting 82.8 in May. Those earning \$25,001-\$75,000 had an 11.4 point gain from ~~last month the 94.5 in May~~ and is at a high of 105.9. Top income earners of over \$75,000 continue ~~to have~~ its lowest score since November 2015 with a 100.3, ~~down for the second straight month.~~

The midwest, west and notheast regions saw their score increase from lat monthly by 25, 18.7 and 15.7 points repectively, from while those a 76 in May to 101 in June. Those in the south have remained steady for the last three months posting a 96.6 in June, 95.3 in May and a 97.5 in April. The west and northeast after holding steady in May at 93.46 and 99.37 respectively saw increases of 18.7 (west 112.21) and 15.17 (northeast 114.54 had a slight increase of 1.3 points relative to May.

Current Economic Conditions

Formatted: Font: Bold

The index of Current Economic Conditions (CEC) of Hispanics increased 14.4 points to a high of 113.2 after posting consistent scores around 99 since February. This marks the first time that the FAU index surpassed the Michigan CEC since its inception; the current difference is 2.4 points. The CEC have females in better economic condition than their male counterparts by 17 points, 122 to 105 which is a bounce back from only 6 points (102 to 96) in May.

~~The index of Current Economic Conditions (CEC) of Hispanics increased 14.4 points to a high of 113.2 after posting consistent scores around 99 since February. This marks the first time that the FAU index surpassed the Michigan CEC since its inception; the current difference is 2.4 points. The CEC have~~

~~females in better economic condition than their male counterparts by 17 points, 122 to 105 which is a bounce back from only 6 points (102 to 96) in May.~~

The older age demographic continue to struggle with a score of 73 after posting a 71 in May both scores are down from April's 86. The other two age groups saw improvements of 24 ~~points (128 in June, 104 in May and 97 in April)~~ for those 18-34, and those 35-54 had a 10 point jump ~~p (117 in June, 107 in May and 105 in April).~~

~~All the respondents scored over 100 for the first time.~~ Those with less than a High School degree scored a 115.2, up 24.5 points since Mays' 90.7 ~~— which was up 11.6 from a 79.1 in April.~~ Other educational attainments cohorts saw large gains including those with a HS degree scoring 119.1, up 18.7 points from Mays' 100.4, while those with some college saw negligible loss from 107.2 to 106.5 and those with college degree or more saw a small gain from 102.5 to 107.9.

For the first time in the last ten months, those earning under \$25,000 reported the highest CEC with a 114.8, up for the third month in a row, 89.6 in May, 82.6 April and 80.5 in February, and up 47 points from November's score of 67.8.

Hispanic respondents' economic conditions increased in the northeast, Midwest and west while in the south it slightly dropped.

Index of Consumer Expectations

~~The Index of Consumer Expectations (ICE) continues to outpace the national average set by UM and in June experienced was by its largest margin of 18.7 points, 101.1 to 82.4. The Michigan Index gave back some of its first gains since November, and its largest gains in over a year dropping from 84.9 to 82.4. varied with the Northeast going from 101.4 in May to 121.7 in June, the Midwest went from 90.1 to 115.9, and the west jumped from 97.6 to 121.3. The South dropped a tick from 101.2 to 100.3~~

The Index of Consumer Expectations (ICE) continues to outpace the national average set by UM and in June was by its largest margin of 18.7 points, 101.1 to 82.4. The Michigan Index gave back some of its first gains since November and its largest gains in over a year dropping from 84.9 to 82.4. Females bounced back from the 12 point drop in April to May from a 100.6 to 88.6 to an 18.4 point gain (107) and now outscore males by 12 points (95.3). Age continues to be a significant variable with those over 55 scoring a 74.1 up from a 59.9 in May, but down .2 points from January's score of 74.3. Those between 18 and 34 years old scored a 119.5 up 24.5 points from Mays score of 95, while those between 35 and 54 years old saw an decrease for the second straight month, h from 105.2 in April, to 99.5 in May, to 94.1 in June.

Global Warming

In your view, is global warming a very serious problem, somewhat serious, not too serious, or not a problem?

Global warming is a very serious problem for 50% of respondents while 7% said it was not a problem at all. Thirty-percent (30%) of respondents said it was a somewhat serious problem. As expected democrats at 85% said it was a somewhat to very serious problem while 76% of Republicans agreed, Independents were in general agreement at 69%. This suggests that Global warming is a non-partisan issue for Hispanic voters.

Do you think global warming should be a low, medium, high, or very high priority for the President and Congress?

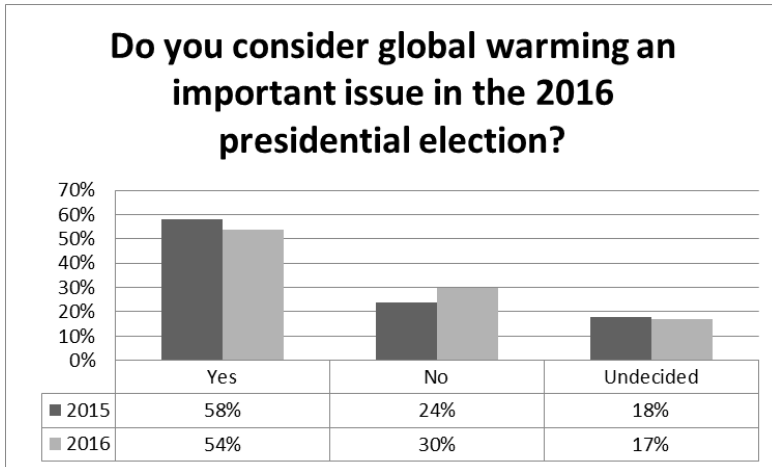

While 39% of Hispanics said global warming should be a high/very high priority for the President and Congress, 29% saying it should be a low priority and 32% said a medium priority. Forty six percent (46%) of Democrats said global warming should be a high/very high priority for the President and Congress while twenty seven (27%) of Republicans said global warming should be a high/very high priority for the president and Congress.

Do you consider global warming an important issue in the 2016 presidential election?

A majority of Hispanics (54%) said Global Warming is an important issue in who they consider to be President. Those under 55 years old rank this as more important of an issue than those over 55, who were a +9 (40% (yes) to 31% (no)) while those 18-34 were +20 (56% (yes) to 36% (no)) and those 35-54 were +36 (58% (yes) to 22% (no)). Global warming was also most important for democrats, +40 (60% (yes) to 20% (no)), then independents +12 (43% (yes) to 31% (no)) and Republicans are -7 (45% (yes) to 52%

Formatted: Justified, Line spacing: Double

(no)). Which varied slightly from 2015 where Global Warming was an important issue in their choice for President with 61% of democrats, 56% of independents and 53% of Republicans.

Some people believe global climate change is currently occurring due to human activities, while others believe global climate change is part of a natural cycle. Which of the following best reflects what you believe?"

When asked whether the cause of climate change was due to humans or nature, 34% said entirely by humans, 25% said entirely by nature, 30% said a combination of the above factors and 2% said they did not believe in climate change. Men are more likely than women to think that climate change is entirely caused by nature, 32% to 18%.

Do you think that the condition of the environment will be better, worse, or about the same for the next generation?

Hispanics are not optimistic about the future of the environment with 35% saying the condition of the environment will be better while 43% said it would be worse. Twenty-three percent (23%) said about the same. Males and females are opposites on this issue with 43% of females saying the environment will be better compared with 27% of males but 48% of males said it would be worse compared with 37% of females. While 53% of Democrats said the environment will be worse for the future generations, only 21% of Republicans said it will be worse. Sixty three percent (63%) of Republicans said that the environment will be better for the next generation while 25 percent (25%) of Democrats said that the environment will better for the next generation.

Pope Francis plant to publish an encyclical, a papal letter sent to all bishops, this summer on the effects of global warming on the poor, and the need to protect earth and its environment. Do you think the Catholic Church can have a major impact on this
