The Economics Department offers two undergraduate programs that prepare students for careers in business and government, as well as for graduate study. The first is Economics with a Business Economics concentration. This program has the same diverse foundation in core business principles as other majors in the College, but also integrates business and economics courses in such a way that the student can analyze business problems with the insight that the economics discipline offers. The second undergraduate program is General Economics, designed to provide a broad liberal arts education with emphasis in the social sciences.

Required Courses for Economics with Business Economics Concentration/EBUS
A minimum 120 credit hours are required for the degree. Other administrative requirements will be needed; see the University Catalog for detailed requirements.
