**Course Number:** MAN 6525  

**Course Name:** Quality Management  

**Course Objectives:**

The course aims to engage the student on contemporary issues pertaining to the management of quality in services and manufacturing, in international and domestic markets, as well as in the private and public sectors. Further, the conceptual and analytical skills developed in this course should enable the student to provide leadership in managing for quality. Much of what the student learns will be practitioner-oriented and directly applicable to the so-called “real-world”. Informative readings on quality management topics from reputable journals, and experiential learning exercises and projects complement the text and shape learning in this class. The student is expected to engage the professor and his or her fellow students in the discussion of pertinent issues.

The course will emphasize communication skills both written and oral and, in keeping with the objectives of the communications component of the MBA program, will expect students to pay particular attention to detail in their papers and oral presentations (as that will affect the grade).

**Prerequisite:**

Graduate Student Standing
